Seeking an entry-level position to leverage technical skills and academic knowledge in a dynamic and growth-oriented organization.

SKILLS

- **Web Development**: Understanding of HTML, CSS, JavaScript.
- **Programming Languages:** Python, C and C++.
- **Testing & Debugging**: Skilled in unit testing, debugging, and code qualities
- **Problem Solving**: Strong analytical skills for resolving complex technical challenges.
- **Communication**: Effective collaboration and communication with teams, stakeholders, and clients.
- **Continuous Learning**: Proactively staying updated with emerging technologies and industry trends.
- **Analytical and Problem-**Solving Abilities

PROJECTS

Project1 |University Front-end Website

A university frontend website built using HTML, CSS, and JavaScript serves as the digital gateway for prospective students, current students, faculty, staff, and other stakeholders. Its primary responsibilities are to provide information, facilitate communication, enhance user experience, and support the university's branding and marketing efforts.

Responsibilities:

- **Responsive Design**: Ensure the website is accessible and functional on all devices, including desktops, tablets, and smartphones.
- **Interactive Elements**: Use JavaScript to enhance user interaction through elements like image sliders, form validations, and dynamic content updates.
- **Navigation**: Implement an intuitive navigation structure so users can easily find the information they need.
- **Visual Design**: Utilize CSS to maintain a consistent visual identity that aligns with the university's branding guidelines.

- **Structure**: Use HTML to structure the content of the website, defining elements like headers, paragraphs, lists, links, and images.

- **Layout and Design**: Apply CSS for layout design, including grid systems and flexbox for responsive designs.
